Qualifying Statement: Fox Valley Habitat for Humanity Project Green Freedom

Project Location: 1921 Jericho Road, Aurora, IL 60506

Location Size: The property is 8.5 acres

Number of Homes: Seventeen 17 with home sites lots of approx. 10,000 sq ft (per zoning) and home size of 1350-1650 sq ft built slab on grade – 3-4 bedroom, 2 bath, 2 car garage

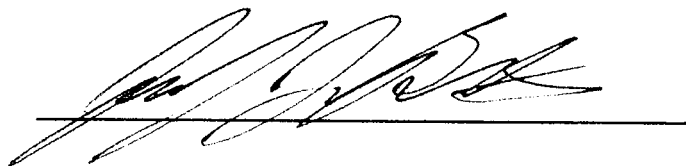

NOTE: This property is fully owned with no loan or debt by FVHFH. The property is undeveloped land. A road will be constructed through the middle of the property allowing homes on either side. Per zoning codes all infrastructure, water, sewer, gas and electric utilities will be underground under the street and underground to the homes.

NO Zoning Variances are being requested.

Project Name: Project Green Freedom

Project Summary: The Fox Valley Habitat Green Freedom subdivision is a breakthrough project for Habitat for Humanity's mission to provide affordable homes for hard working families of low to moderately low income. At FVHFH we are able to build these affordable homes for our families with the help of extraordinary donors, sponsors and partners, and give our homeowner families a zero percent interest mortgage at a cost of just 30% of their income for mortgage, taxes and home insurance. We do not charge PMI for principal mortgage insurance. This makes their monthly payment less than what they were paying in rent. But, there is another critical element of affordability that FVHFH wants and needs to address for our families. As energy cost continue to rise along with food and goods and supplies of all kinds, we feel it is necessary and our responsibility to build homes that are more energy efficient to save ongoing costs for our homeowner families. The Habitat Green Freedom subdivision will build homes to a **net zero to net positive** use of electrical energy. This will be accomplished with established but rarely used construction techniques in the building of affordable homes. Working with national and local partners, FVHFH will build homes with smart energy technology and construction techniques to accomplish this goal. These will be quality built homes that will not adversely affect the value of the homes in the surrounding neighborhoods. We have coordinated with City staff to confirm traffic will not have adverse effect on Jericho Road. In their detailed planning our engineers have been diligent in complying with roadway standards and Fire Access in addition to detailed landscaping and Retention pond. The homes will be built with concrete driveways and sidewalks with concrete public sidewalks connecting each home. There is also an area where we will add a small park and Gazebo in an open area on the northeast side of the property for the enjoyment of the neighborhood.

Value: The homes in this project will be built for stability and sustainability through resilient building using ICF wall construction, extraordinary insulation, special mechanical ventilation system, tankless water heaters, and combi HVAC systems and heat pumps. These homes will also have Solar roof panels with Battery back-up. This results in a safer, stronger, healthier and more affordable home.
