Attachment “A” Scope of Work

Project Description

The US Bureau of the Census contacted the City of Aurora in 2018 to establish a partnership and request the formation of a Complete Count Committee for the 2020 U.S. Census. In 2010, the City established a joint Complete Count Committee which developed strategies and coordinated outreach activities with local partners. Efforts targeted hard to count census tracts. At the conclusion of the 2010 Census, the City of Aurora's population increased from 142,990 based on the 2000 Census to 197,899. The City has grown by about 55,000 people over the past 20 years and is now the 2nd largest city in the state of Illinois. And during that time, the city's minority population has grown significantly – the number of Hispanic residents has almost doubled, and the number of Asian residents has tripled.

The Census is used for many purposes – population totals from the census determine the number of seats each state has in the House of Representatives and states also use the data to redraw their legislative and school districts. The population totals also affect funding in our community, and data collected in the census help decision makers know how your community is changing. Approximately \$675 billion in federal funding is distributed to communities each year. According to research reported in Crain's Chicago Business, Illinois could stand to lose \$1.2 billion in funding over the next decade should the 2020 Census undercount the State's population with a 1% undercount. Approximately \$350,000 in funding would be lost by Aurora each year with such an undercount and over \$3.5 million over the next ten years. Moreover, Census data is used to forecast future transportation needs for all segments of the population, help determine areas eligible for housing assistance and rehabilitation loans, and assist in designing facilities for people with disabilities, the elderly, and children.

In June 2019, Aurora City Council established the Aurora Complete Count Committee, which is a volunteer advisory committee of city, county, non-profit organizations, educational institutions, health and human service organizations, cultural and faith based organizations, and others to increase awareness and motivate residents to respond to the 2020 Census.

Need and Goals Statement

The Aurora Complete Count Committee released a request for qualifications on December 11, 2019 to interested agencies to hire trusted partners to serve as a resource to help support the full committee as well as five established subcommittees. Each agency will perform a variety of tasks to support the three main goals established by the committee:

- Focus on establishing relationships with different stakeholders to increase community awareness and participation in the 2020 Census.
- Develop strategies to increase the count of populations defined as hard to count.
- Promote the availability of US Census jobs to Aurora residents and surrounding communities.

Each agency will also assist five subcommittees including Business, Communications and Technology, Education, Community Based, and Faith Based to assist in meeting the three goals above including coordinating specific outreach tasks requested by the Aurora Complete Count Committee or Project Coordinator.
