

Bid 20-10

QBS: Water Distribution System Leak Detection Services Professional Services

Bid opening – February 12, 2020

ADDENDUM NO. 1

Page 1 of 2

TO: All Bidders

FROM: Engineering Division, City of Aurora

DATE: February 10, 2020

THIS ADDENDUM FORMS A PART OF THE BIDDING AND CONTRACT DOCUMENTS.

1. On the Professional Services Scope of Services page 4, 2nd bullet point, the 3rd sentence shall be replaced with the following:
 - d. Ultrasonic leak detection shall be performed on every fire hydrant, fire hydrant auxiliary valve and mainline valve. Accessible curb stops may be used as needed depending on pipe material or to pinpoint leaks.
2. The on-call leak detection services shall require a 2 hour response time over the full length of the contract year on a 24 hours per day, 7 days a week basis. The City budgets approximately 80 on-call leak detection service requests per year. However, this is just a budgetary estimate and the amount of on-call leak detection service requests will vary based on actual needs.
3. Per GIS data, the City's water distribution system contains approximately 11,745 valves and 9,515 fire hydrants. There is no system count on curb stops but the system contains approximately 49,171 water accounts.
4. The 2020-2022 Leak Detection exhibit table lists footages of known pipe material from the City's GIS system. The Diameter column in this table indicates PVC for some diameters. Where no material is indicated, the material is unknown. However, a vast majority of this unknown pipe material footage is metallic being ductile iron or cast iron.

Sincerely,

John D. Hoffmann, P.E.
Engineering Coordinator
City of Aurora Engineering Division

PLEASE ACKNOWLEDGE RECEIPT OF THIS ADDENDUM BY FILLING OUT THE FOLLOWING AND SENDING AN ORIGINAL OR FAX COPY OF THIS SHEET TO THE CITY OF AURORA ENGINEERING DIVISION AT 630/256-3229 OR
