Subject: Re: Another accident at Garfield and Gladstone

Rod,

I will forward your request to our traffic engineer and ask for him to study, evaluation and make a recommendation on a 4 way stop at this intersection.

Thanks,

Bill

Mr. Alderman,

I again implore you and the City Council to consider making the intersection of Garfield and Gladstone a four-way intersection. There have been countless accidents at the intersection in the 13 years we have lived here. It almost always involves an Aurora University student, like today.

Many of the students are commuters, and either they think it's a four-way stop or they are not paying attention. The driver responsible is always the one traveling either north or south on Gladstone.

It is already a busy intersection with West high students, Pace buses, school buses and AU students traveling up and down the streets. Cars parked along Garfield often shield the eastbound-westbound drivers on days West High is in session.

Thank you for your consideration,

Rod Kelly
