DoIT

Sole Source Justification Form - Part I

Section I - General Information

Department/Bureau/Section: DoIT VMO Procurement

Need Identified Date:

Sep 6, 2019

Supply/Service Need By Date:

Sep 29, 2019

Project Title: JPMC - ESRI GIS Products and Maintenance

Vendor: Environmental Systems Research Institute

Provide a description of the supplies or services required:

Establish a JPMC Master Contract with Environmental Systems Research Institute (ESRI) to enable governmental units, and qualified not-for-profit agencies to purchase ESRI GIS Products and Maintenance services.

Value: Estimated

Value of Initial Term, this Change Order or Amendment:

1,800,000

Will this Sole Source amend a Professional or Artistic Services contract? ☐ Yes ☒ No

*Sole Source may not be used for amendments for Professional or Artistic Services if the amendment would increase the value by more than 5% of the initial award or extend the term by more than 60 days.

Type: New Sole Economically Feasible Source

Section II - Proposed Term

☐ One-Time Purchase ☒ Term Contract

Estimated Contract Begin Date: Sep 29, 2019

Estimated Contract End Date: Sep 28, 2020

Number of Potential Renewals: 0

Length of Each Renewal in Months: 0

Total Value of All Renewals: 0

If a Term Contract, does the term, including renewals, exceed 12 months? ☐ Yes ☒ No

Section III - Funding Source

Select the type of funding to be used (Check all that apply): ☒ State Appropriate Funds ☐ Federal Funds ☐ Other (Explain):

Section IV - Sole Source Justification

This purchase is economically only available from a single source primarily because it is: (If "Other" explain in one sentence)

Items are Copyrighted or Patented and the Items are Only Available from the Holder

Are there secondary justification(s) for this sole source? ☒ Yes ☐ No

Another justification that this purchase is only available from a sole source is because it is:

Software License/Upgrade/Maintenance

Another justification that this purchase is only available from a sole source is because it is:

Compatibility of Equipment, Accessories, Replacement Parts or Service

 07/1/05 - 06/30/06 \$200,000 ESRI Master PBC 910 CMS5009100 Sole Source
 State of Illinois has procured contracts for the ESRI sole source products for over 12 years for it's on going needs

Section VI - Business Rationale

1. Provide a detailed explanation of the need for the supplies or services:

Establish a JPMC Master Contract with Environmental Systems Research (ESRI) for the purchase of their sole source GIS products and maintenance. Multiple agencies have the need for on going maintenance, support and additional licensing for growth beyond the current contract end date of 09/28/19.

ESRI GIS licenses are used by a variety of agencies to capture, manage, analyze, and display all forms of geographically referenced information. Agencies perform resource management, logistics, planning, transport, surveying and demographic studies. IDOT utilizes it for road and highway planning and surveying. DNR utilizes it to survey and analyze lakes, rivers and waterways, etc. Maintenance is required to ensure the GIS software applications are working properly and providing the needed information from all user agencies.

2. Provide a list and describe in detail the specifications required to satisfy the need:

Statewide Master contract with ERSI for proprietary GIS related products, maintenance and support. All items listed on the ESRI MPA Price List provided by ERSI will be available on the resulting contract. ESRI GIS products are only available directly through ERSI as a sole source and not available through reseller channels.

Requesting Agency/University

DoIT

3. Provide detail explaining the justification selected in Section IV to explain why the requested supplies or services are the only ones available that can satisfy the agency or university requirements?

The proprietary ESRI GIS related products utilized by numerous state agencies are only available through ESRI. In addition the State of Illinois DoIT has standardized the ESRI GIS product for use by throughout the state and there are no current plans to replace and/or to make significant costly changes (both time and money) to multiple agency critical applications (96 in total) to integrate with another GIS vendor. There are other GIS vendors in the marketplace, but the cost of converting all current user platforms to a new GIS product would be extremely cost prohibitive. DoIT estimates the cost of converting the state GIS platforms to a new vendor at roughly \$8,300,000, which doesn't include the cost of the new software and support.

4. What are the unique features of the supplies or services that are not available in any other product or by any other vendor? Provide specific quantifiable factors/qualifications:

The GIS related products currently utilized by the state are only available through ESRI direct (no resellers). The ESRI product has been the State standard for GIS mapping software since 2005. Converting to a different vendor GIS solution will require a substantial investment of time and money to convert the state's systems to a new provider's GIS product. In addition to the cost of conversion there will be a significant increase in existing costs for some years with overlap of paying for two separate GIS infrastructures (existing and new vendor) until all applications are converted. At this point the State has no immediate plans for converting the 96 existing applications away from the ESRI GIS products.

5. Has the Agency or University considered alternative supplies or services to satisfy their need? ☐ Yes ☒ No

5a. If no, why weren't alternatives evaluated?

At this time DoIT is not prepared to incur the cost of replacing the existing ESRI GIS standard. However DoIT has recently undertaken the Application Rationalization initiative which will begin to map the importance of applications to the business as well as the future disposition (replacement, enhancements, replacement and retirement). This initiative should give better clarity in terms of defining the road map for these types of applications that could allow alignment with more competitive procurements in the future.

6. Are there resellers or distributors?

☐ Yes ☒ No ☐ N/A

7. What efforts were made to get the best possible price (i.e. did the agency/university negotiate) and how did you determine the price for this purchase is considered fair and reasonable?

The price points previously shared by ESRI have not changed much over the years. The current contract ESRI pricing for FY19 shows no increase from the price list of the previous contract in FY18. Since the ESRI GIS products we need are sole source we are unable to attain these products via resellers. DoIT's estimated spend under this contract is \$1,800,000. However, the resulting contract will be a JPMC indefinite quantity contract and will not contain a not to exceed amount.

8. Will this purchase obligate the State to this vendor for future purchases such as maintenance, licensing or continuing need?

☐ Yes ☒ No

9. What will be the financial or other impact to the State if this sole source is not approved and a competitive bid is required?

The impact of switching to another vendor GIS product would be monumental, both in terms of time and money. In addition to possible new investments in another vendor product, there would be significant impact to re-writing applications and interfaces that currently exist from State Agencies critical business systems. In a survey of 5 agencies (DOT, DNR, EPA, DPH and ISP), that have 96 applications dependent on ESRI GIS; 59 of those applications have been estimated to cost approximately \$8,300,000 for conversion (these costs do not include the costs of the possible replacement GIS platform which would be both software and hardware components); 37 of those agencies applications have stated that it is not possible to either calculate the cost to convert or that converting may not be feasible based on integration into federal systems built on the ESRI GIS platform. These lists are not all inclusive of all the GIS usage agencies but it gives a fairly good example as to how large the impact of switching off of the ESRI products could be to the State of Illinois.

10. Is there any additional information you would like to add to justify this sole source?
