Subject: No Parking Sign

Hi Bob,

Thanks for taking the time to speak with me about the problem we encounter with our newly built dock at 820 N. Russell. We own the building at 821 N. Russell and the building directly across the street at 820 N. Russell. There are truck drivers that are delivering from other states and park their trailers to rest along the strip of grass directly across from our dock at 820 N. Russell. With a trailer parked along the street directly across from our dock we can not use the dock area and if a truck is in the dock it gets blocked in until the trailer is moved from across the street. We would like to have a No Parking sign across the street so we don't encounter limitations on our use of the dock at 820 N. Russell. I am attaching photos of my car parked directly across the street to indicate how hard it would be to get into and out of the dock. We ask our employees not to park there, because even with cars parked across the street there is great difficulty getting in and out of the dock. We've had to ask truckers to move from the area in order to utilize the dock and they get hostile. Your help would be greatly appreciated in enacting a parking zone in that area. Thank you!

Regards,

John Chiampas
