
Lightweight Level III+

Lightweight Level III+ Shield

The United Shield Level III+ lightweight ballistic shield is a mobile high protection shield which provides multi-strike protection from standard Level III rounds (7.62×51 Nato Ball) as well as the 7.62×39 123gr MSC AK47 and Multiple 5.56×45 rounds (55gr M193 and 62gr LE223T3 Federal Bonded). The shield is curved and is constructed using a proprietary UHMWPE to achieve industry leading weight. These new lightweight shields are offered in several different shapes and sizes to fit the end users needs. Standard lightweight Level III+ shields come standard without viewport, but viewports are available.

Addition of an LED light is also available.

Spec Sheet: LW level III+ Standard Shields

Specifications

Levels of Protection

The shield is constructed from 100% UHMWPE and is rated to NIJ Level III+. This unofficial level covers the traditional NIJ Level III performance for 6 strikes of 7.62 x 51mm NATO Ball (US
