11. The undersigned further agrees to begin work not later than **ten (10)** calendar days after the execution or by the date stated within the contract documents and approval of the contract and contract bond, unless otherwise provided, and to prosecute the work in such a manner and with sufficient materials, equipment, and labor as will ensure its completion within the time limit specified herein, it being understood and agreed that the completion within the time limit is an essential part of the contract.
12. The undersigned agrees to complete the work within the time stipulated in the Special Provisions.
13. All work shall be completed to the satisfaction of the Engineer by the above dates unless the Engineer in accordance with the specifications grants additional time. In case of failure to complete the work within the time named herein, or within such extra time as may have been allowed by extensions, the undersigned agrees that the City shall withhold from such sums as may be due him under the terms of the contract the liquidated damages as set forth in the Standard Specifications, which costs shall be considered and treated not as a penalty, but as damages due the Municipality from the undersigned by reason of inconvenience to the public, added cost of engineering and supervision, and other items which have caused an expenditure of public funds resulting from the failure of the undersigned to complete the work within the time specified in the contract.
14. If this proposal is accepted and the undersigned shall fail to execute a contract and contract bond as required herein, it is hereby agreed that the amount of the check or draft or bidder's bond substituted in lieu thereof shall become the property of the City and shall be considered not as a penalty but as payment of liquidated damages due to delay and other causes suffered by the City because of the failure to execute said contract and contract bond, otherwise said check or draft or bidder's bond substituted in lieu thereof shall be returned to the undersigned.
15. Accompanying this proposal is either a **5% Bid Bond** or a proposal guaranty check, complying with the specifications, made payable to the City Treasurer of the City of Aurora. The amount of the check is \$ 5% of bond
16. The undersigned submits herewith his schedule of prices covering the work to be performed under this contract, he understands that he must show in the schedule the unit prices for which he proposes to perform each item of work, that the extensions must be made by him, and that if not so done, his proposal may be rejected as irregular or non-responsive.
17. The undersigned agrees to conform to Section 100 of the Standard Specifications and to Article 107.27 of that section indemnifying and saving harmless the City of Aurora and its officers, agents, and employees. The Contractor shall provide insurance with limits as stated in the Article 6.7 of the *City of Aurora - General Specifications*.
18. The City of Aurora reserves the right to reject any or all of the bids and to waive any and all irregularities and technicalities. The City of Aurora shall either award the project or reject the bids within Sixty (60) calendar days after the bid opening. This time frame may be extended upon mutual agreement of the City and the Bidder.
19. The undersigned of this proposal agrees that he or she has examined all sections of this Proposal, Specifications, and Bidding Documents and hereby understands and accepts the provisions for access, or the lack of access, to the construction site and shall claim no compensation other than the prices as bid for this condition of accessibility.

*A: String lights will be connected to the aircraft cable using standard hog rings. The layout of the cable and lighting is shown on the "Tentative String Light Layout" plan page included with the RFB (cable shown in green). The string lights will be direct wired into an existing power riser located near the east end of the alley connecting to Broadway with a single controller (provided by the City) at this location.*

*The scope of work included under Bid Alternate item "String Lights" has been revised to include purchase and installation of aircraft cable running parallel with and providing reinforcement to all string lights. The string lights shall be connected to the cable every 4-8 using hog rings. Note that the aircraft cable which connects the poles and mast arms (shown on the "Tentative String Light Layout" plan page in green) shall still be furnished and installed by the City.*

**Q: Can you provide more information as to what type of structure is proposed to mount and hang the lights?**

*A: At the sidewalk/mast arms, the string lights shall be anchored to the aircraft cable shown in green on the "Tentative String Light Layout" plan page using hog rings. **Q: Slats are not typically used in aluminum fence, but rather steel ornamental. Please confirm material.**

*A: The fence shall be Elite EFF-20 industrial aluminum. Slats can be aluminum, steel, vinyl, or other material which provides the necessary visual obstruction.*
