Response to requests received:

- 1) Cat 926M loader is 168 Gross Hp at 1800 RPM and John Deere 524L is 161 Gross Hp at 1800 RPM.

Answer: 161 Gross Hp at 1,800 RPM as provided by the John Deere 524L is acceptable.

- 2) The bid requires a Cat Fusion front coupler and John Deere's front coupler is different. The Fusion coupler is owned by Cat. Is it OK to bid the factory John Deere Coupler and the 2.75 Yrd Bucket as specified?

Answer: It is acceptable to bid the factory John Deere Coupler with the 2.75 CY bucket. Bids for equipment supplied with couplers that are not compatible with Caterpillar forks must include a new pair of forks compatible with the coupler supplied.

3) I have a question regarding the wheel loader specifications. In Appendix A, Page 4 it states that "Any proposed machine must be compatible with Caterpillar attachments". The spec notes "Quick Coupler, Fusion". This is a patented Caterpillar system that no other manufacturer can supply.

Answer: See answer for question 2 above.

4. To be added to the specifications:

The wheel loader shall be equipped with an on board bucket scale such as the CAT Payload or equal.
