

Stange Aviation, LLC, was formed in 2023 to promote aviation within worldwide business communities. Stange plans to do so by immediately offering the following aviation-related lines of services at its global headquarters at the Aurora Municipal Airport in Sugar Grove, IL.

- Specialized Freight Service
- Aircraft Refurbishment
- Aircraft Interior Design
- Aircraft Detailing
- Lease or Own Stange Aircraft and Aircraft Accessories
- Distribute Loose It Up lubricants to the aviation world

Future aviation services may include aircraft sales and acquisition.

"The Aurora Municipal Airport is one stoplight away from the Loop, and it is easier to get in and out of the city than the nearby general aviation airport in DuPage County, said owner John Stange Jr.

Beginning this summer, Stange Aviation plans to operate out of a Revv Aviation hangar to provide six initial aviation services.

### **Company and Management**

Established in 2023, Stange Aviation, LLC, is owned by businessman John Stange, Jr., whose background is professional motorsports, manufacturing and business management.

### **The Market/Competitive Advantages**

Aviation, manufacturing and racing go hand in glove. All are fast-paced, speed-based businesses that attract many of the same customers. The Chicago metropolitan market has 8 million people. It is located perfectly in the middle of the country, making it easy to get to and from racetracks, many of which are not located near population centers. The Aurora Municipal Airport is the only metropolitan area airport that has land available for business development and expansion, both of which Stange plans to increase as its operations grow.
