"I just want to

*share my concerns with you as I did the city about the Smithfield and Stuart Kaplan intersection. This 3 way intersection with no stop sign or Yield sign is often driven through quickly. The trees on the corner are so overgrown that cars are not squaring their turns but rather taking overly wide turns. This concerns me because so many children cross here or ride bikes down the street and I would hate for some type of accident to happen due to obstructed views from trees. This also is a school bus stop intersection for elementary, middle, and high school. There is too much traffic here and feel this intersection should be made a priority by the city tree trimming crew. I hope you can make recommendations to support this matter and expedite it getting addressed sooner than later. Thank you, '*
