### Qualifying Statement

Project: East Aurora High School Expansion

The East Aurora School District # 131 proposes to expand the existing high school on Fifth Avenue to meet current and future needs of the students. The proposed addition will consist of 20 new classrooms, a fine arts center, cafeteria remodeling, a new stadium with a football, soccer and track field with 2,500 total seats and a revised parking lot and drop off areas. Parking lot improvements will include expansion of the parking lot to the south of the new stadium with storm water detention storage under the parking lot, reconfiguration of Tomcat Lane to accommodate an onsite drop-off lane and a new drop-off/parking lane in front of the building. The plan also proposes new on-street parking on South State Street. The building expansion will increase the capacity of the high school from approximately 3,800 to 4,400 students to meet the anticipated growth in the student population in the district. A Plat of Subdivision will be done to consolidate all the various parcels the District owns into one lot along with any necessary easements.

The following standards will be addressed as noted:

- a.) The public health, safety, morals, comfort or general welfare. The proposed improvements will result in improved learning capability for the students and provide better access to the schools facilities. The new stadium will be available for other public use which provides general welfare for the community.
- b.) The use and enjoyment of other property already established or permitted in the general area. The proposed improvements will not take away from the use or enjoyment of other property in the area but instead will enhance it by improving the parking and traffic flow patterns.
- c.) Property values within the neighborhood. The improvements made to the school site will increase the property values within the neighborhood.
- d.) The normal and orderly development and improvement of surrounding property for uses established or permitted within their respective existing zoning districts. The school improvements will only enhance the development of surrounding property by providing better traffic patterns in the area.
- e.) Utilities, access roads, drainage and/or other necessary facilities. The proposed school improvements will enhance all of these facilities per our proposed plans.
- f.) Ingress and egress as it relates to traffic congestion in the public streets. The proposed school improvements will improve traffic congestion in the area by providing onsite drop off and pick up areas and by consolidating Tomcat lane to one 3 lane entrance with a dedicated left lane and right turn lane out of the site. Also a drop off lane is proposed for the front of the building. All this will help with the traffic congestion in Fifth Avenue.
- g.) The applicable regulations of the zoning district in which the subject property is proposed to be or is located. Most of the property is zoned P-Park and the few parcels currently zoned residential will be rezoned to P-Park. The site will be approved as a Special use with a planned development. So all regulations will be met.
- h.) A bullet point list of any variances, modifications, or exceptions that you are seeking from the City's code and ordinances. Variances for building set-back, parking requirements and detention needs will be requested by the School District as part of the special use.
