LOCATION - Seminary Avenue, Aurora, IL, USA AND LASALLE ST

WHAT IS THE REASONING BEHIND YOUR REQUEST? - Traffic Control Issues When travelling down seminary near LaSalle, I don't have any sign but LaSalle does and I've had several times where people run the yield signs and then proceed to honk at me and give me the finger when I have the right of way. People don't know how to treat a yield sign. I've finally had enough today when a car braked so hard and stopped inches from hitting my car. I'd ideally like the yield signs to be replaced with stop signs.

CURRENTLY ASSIGNED TO - Bob Greene in PW-Engineering

DESCRIPTION - I am submitting this request to find out what the Traffic Engineer can do about a dangerous intersection. I live off of Seminary and drive west to Broadway everyday for work. When travelling down seminary near LaSalle, I don't have any sign but LaSalle does and I've had several times where people run the yield signs and then proceed to honk at me and give me the finger when I have the right of way. People don't know how to treat a yield sign. I've finally had enough today when a car braked so hard and stopped inches from hitting my car. I'd ideally like the yield signs to be replaced with stop signs. Thank you so much!
