FURNITURE CO.  
— A PRESTWICK COMPANY —

Products such as our **Milano Loveseat** reveal a lot about our emphasis for product design to exceed basic "form and function." Adhering to deliberate design-thinking makes our products better, stronger, and safer using innovative methods you likely won't be able to notice – but they are there.

## A COMMERCIAL GRADE COMFORT

Our line of commercial grade fabrics are chosen for performance in both durability and comfort.

## B BACK CUSHION

The Back Cushion is blown polyester fiber. This cushion is 15 Denier\*\* and encased in a non-woven bag. \*\*Denier refers to the thickness of the fiber

## C INNER CUSHION FOAM

Standard: 1.45 lb per sq ft and has a 28ILD\*. Contract: 1.85 lb with a 31 ILD\*

\*ILD is Indent Load Deflection, this refers to the amount of weight need to compress the foam one inch

## D POLYESTER WRAP

Both Standard and Contract seat foams have a polyester wrap on the top and bottom of the cushion.

## E 97% PURE RECYCLED PLASTIC (MILK JUGS)

Our products are manufactured from the highest quality recycled plastic material available. It is naturally resistant to rot, rust, decay and insects - and requires virtually no maintenance.

## F MARINE-GRADE HARDWARE

Our fasteners are made with 316 marine-grade stainless steel. Although you may never notice it, we pride ourselves in hiding as many as we possibly can.

## G RESILIENCE FROM THE BOTTOM UP

Our frames are CNC machined, fully welded, and finished with exterior UV-grade powder coating, hiding the products strength and letting the design shine.

# Terms of Use, Liability and Design Disclaimer

## 1. General Product Use and Performance

All products manufactured and sold by The Prestwick Companies and its brands, including Sister Bay Furniture, are designed for use in commercial, municipal, and hospitality settings under normal conditions, with proper installation and care. While we take great pride in our craftsmanship, no product is guaranteed to be free from failure due to misuse, improper application, or unforeseen environmental or structural conditions.

## 2. Custom Products and Design Modifications

Custom-built products—including furniture, furnishings, or accessories that vary from our standard specifications in size, material, structural elements, finishes, or integrated features—are created based on input provided by the customer and/or the sales representative. Due to the one-off and often experimental nature of custom units:

- There is an inherently increased risk of product failure or unexpected performance limitations.
- The customer assumes responsibility for reviewing and approving all drawings, materials, and design elements prior to production.
- Sales representatives are expected to clearly communicate to the customer that any deviation from a standard offering may impact product durability, structural integrity, or compatibility with installation and usage environments.
- The Prestwick Companies and Sister Bay Furniture are not liable for failure, aesthetic variations, or performance issues that result from customer-requested design modifications, deviations from standard use, or environmental conditions outside of our testing scope.

## 3. Standard Products

Products listed in our catalogs or quoted as standard offerings are tested and validated for performance within typical commercial use. However, all products—standard or custom—are subject to limitations and should not be used outside of their intended design purpose. Failures may occur due to, but not limited to:

- Overloading
- Excessive exposure to moisture, UV, or chemicals
- Vandalism or improper handling
- Failure to follow care and maintenance guidelines
- Incorrect or incomplete installation

## 4. Acknowledgement of Terms

By accepting a quote or placing an order, you acknowledge that:

- You have reviewed and approved the design specifications provided
- You understand the limitations and care requirements associated with your product(s)
- You accept responsibility for product performance when based on requested customizations or installation outside standard conditions

## 5. Warranty Limitations

Our limited warranty does not cover:

- Product failures caused by customer-directed design changes
- Improper installation or handling by a third party
- Normal wear and tear or cosmetic aging
- Use in conditions not appropriate for the materials selected
- Damage from misuse, neglect, or non-compliance with care instructions
