

# City of Aurora

Near Site Clinic

# Traditional Healthcare In the U.S. is Broken

## **Traditional “fee for service” healthcare**

- Incentivizes specialists, medications & volume over value
- Transactional, Fragmented
- High costs + Poor outcomes

## **Advanced Primary Care Model**

- Same-day / Next-day appointments
- Focuses on patients – Not billing & volume
- Improved health outcomes
- Reduced health spend
- Great experience for plan sponsors, providers and patients

**You can leverage your healthcare spending to transform the health of your people and improve a broken healthcare system.**

# Challenges for City of Aurora

1. Accessing primary care providers for same or next day appointments
2. Referrals to top specialists
3. Challenges navigating the healthcare system
4. Behavioral health provider access
5. Occupational Health Services
