TRANE

TRANE CONTROLS UPDATE
Legacy Product Obsolescence

TECHNOLOGY NOTIFICATION:

Replacement parts no longer produced for many older panel types

Panel Type	Controller Phase-out Date	Replacement Parts No Longer Produced
Summit BMT/BCU	May 15, 2017	Dependent on availability of components
PCM	December 31, 2004	No longer available
UPCM	December 31, 2006	No longer available

PLAN NOW...Minimize your risk of failure...Upgrade to Tracer™ SC!

- Avoid control system obsolescence and potential downtime
- Improve energy and operational efficiency
- Provide web and mobile device support
- Keep building control systems current and supportable
- Avoid compatibility issues as Tracer Summit software will not be supported beyond Windows 10

Upgrade to current web-based technology and fully supported controllers. Minimize hardware and installation costs!

With proper planning, upgrading from your legacy controls can be accomplished with no disruption to your building operation!

Contact your Trane account manager to help you with a migration plan to address your aging controls in a way that best meets your business needs while minimizing your risk of a failure.
