Re: **Qualifying Statement**
Proposed Fox Valley Residential Phase II Development (Preliminary Plan)
195 Fox Valley Center (North Parking Lot)
Aurora, IL 60504

Atlantic Residential, in a joint venture with Centennial Real Estate and Focus Development, is proposing to develop the existing Carson's parking field into a 9.12-acre parcel for a proposed multi-family residential development. The proposed development will consist of construction of a four-story apartment building "wrapped" around an interior precast parking structure with associated utilities, grading, paving and landscaping. The building will be constructed largely of masonry and precast materials. Centennial Real Estate is proposing to develop a separate portion of the existing Carson's parking field into an approximate 1.75-acre parking lot. Below is a summary of the proposed building specifications and total parking provided onsite.

Building Summary		
Building Type	Area of Building	Building Height
Residential Building	+/- 370,000 SF	+/- 52'-0"
Covered Parking	+/- 105,000 SF	+/- 49'-0"

In total, the residential building totaling 370,000 SF is proposed. Below is a parking summary for the project.

Residential Site Parking Summary	
Total Parking Required	479
Surface Lot Parking Provided	136
Covered Parking Provided	311
Accessible Parking Spaces Provided	8 garage, 4 surface, 2 parallel
Parallel Street Spaces Provided	24
Total Parking Provided	485

NOTE: Only parallel spaces on the same side of the street as multi-family building are included in parking counts in the chart above.

South Parking Lot Summary	
Total Parking Provided	160

The following describes how the development relates to the following standards:

1. The public health, safety, morals, comfort and general welfare.
These facilities will be designed in accordance with all laws and codes to maintain the existing public health, safety, morals, comfort, and general welfare. The facility will help to attract and retain jobs in Aurora with 315 full time jobs anticipated. The use of sidewalk, screening and landscaping all provide safety and welfare measures for pedestrians.
2. The use and enjoyment of other property already established or permitted in the general area.
The proposed multi-family development is in an established Planned Development District that was previously the parking lot of a single anchor retail store. The residential development now provides a dog park, pool, and other outdoor gathering areas. Promoting recreation and gathering space for residents in this area will transform this area with the intention to attract additional patrons to the existing mall.
3. Property values within the neighborhood.
The addition of a residential building in the existing Carson's lot will not adversely impact property values of surrounding areas. The adjacent mall and plaza will become a location of entertainment and will attract future residents.
4. The normal and orderly development and improvement of surrounding property for uses established or permitted within their respective existing zoning districts.
The proposed multi-family development represents an improvement to the existing PDD by developing a vacant space into a utilized residential and recreation space. Adjacent uses are commercial and residential within the PDD on all sides.
5. Utilities, access roads, drainage and/or other necessary facilities.
Water, sewer, gas, and electric utilities exist within the current mall property and will be utilized to service the proposed developments. The site drains to existing storm structures and is conveyed via underground storm sewer to an existing regional detention pond, which serves the mall in current conditions. The multi-family development decreases impervious area and does not require additional detention. Water quality volume will be provided for the redevelopment area.
6. Ingress and egress as it relates to traffic congestion in the public streets.
Trucks and pedestrian vehicles will utilize one of two entrances onto the site from New York Street. Existing parking lot reconfiguration has been included to direct traffic flows towards the mall.
7. The applicable regulations of the zoning district in which the subject property is proposed to be or is located.
The project is being constructed in accordance with the City of Aurora standards and will be compliant with all variances, modifications or exceptions as described with the Plan Description for the development.
8. A bullet point list of any variances, modifications or exceptions that you are seeking from the City's Codes and Ordinances
9. The proposed development will be compliant with all variances, modifications or exceptions from the City's Codes and Ordinances as described with the plan Description for the development. Current variances sought:

- STC/IIC rating variance identical to Fox Valley Residential Phase 1
- Reduced exterior masonry at interior courtyards and inside corners of exterior courtyards
- Upon gas utility provider approval of single gas meters for the residential buildings and City of Aurora concurrence with the means of subsequent sub-metering and the installed infrastructure for the same, the city of Aurora would allow this method of metering for gas as a design alternative
