Thanks for the information. I will forward your concerns to our City Engineering department for review. Ultimately, this is something that would need to be discussed and approved at a City General Operations meeting.

SGT Woods,

I was stopped by two subjects who work at the auto service on the n/e corner. They expressed extreme concern for this intersection due to traffic driving at a high rate of speed and not stopping for the stop sign. This occurs mostly for southbound traffic. It is believed they are concentrated on the light at Galena and not seeing the stop sign. They requested a flashing warning device that a stop sign is up and coming at the intersection. The extreme concern comes from the children who walk across the street and where they would potentially think a vehicle is stopping for the stop sign, continue across the street. At this time, the two citizens are coming out to the intersection to help the children cross the street. I can imagine their concern may go overboard should they catch up to a vehicle that doesn't stop.

Any help in this matter would be greatly appreciated.

Thanks,

Driscoll

Officer K. Driscoll #109
