Airport:	Aurora Municipal	LOCID:	ARR	Local Priority:	1
Project Description:	Airfield Pavement Rehabilitation – Phase 3 (Area 1)				FFY 2019
					
Justification:	<p>The Aurora Municipal Airport is a general aviation reliever facility which currently serves the general and corporate aviation demands of Chicago's western suburbs and the City of Aurora. As a reliever to Chicago O'Hare International Airport and Chicago Midway International Airport, Aurora Municipal Airport will reduce air carrier congestion by providing facilities and services suitable for attracting and diverting general aviation and corporate business aviation away from major air carrier airports. According to the Illinois Statewide Aviation Economic Impact Study (IDOT Aeronautics 2012 study), the Airport has a total economic impact of \$101.8 million to the community.</p> <p>Per the pavement condition index (PCI) surveyed and performed in 2016, the main apron areas showed PCI values ranging from 76 to 84. Some areas along the apron have experienced differential elevations, cracking and edge spalling. The Project will be an "Other Category" related project per FAA Order 5100.39A. The proposed improvements include: apron panel removal and replacement, PCC joint cleaning and sealing and other improvements.</p> <p>The required funding for the project is being requested from the FY 2019 AIP program. The checklist to support an environmental finding of Categorical Exclusion (CATEX) will be submitted as a portion of the project development.</p>				
Cost Estimate: (Attach detailed cost estimate)

Project Description:	Install Airport Perimeter/Security 10' Fencing				FFY 2019

Justification:	<p>The Aurora Municipal Airport is a general aviation reliever facility which currently serves the general and corporate aviation demands of Chicago's western suburbs and the City of Aurora. As a reliever to Chicago O'Hare International Airport and Chicago Midway International Airport, Aurora Municipal Airport will reduce air carrier congestion by providing facilities and services suitable for attracting and diverting general aviation and corporate business aviation away from major air carrier airports. According to the Illinois Statewide Aviation Economic Impact Study (IDOT Aeronautics 2012 study), the Airport has a total economic impact of \$101.8 million to the community. Proposed east quadrant fencing is a continuation of previous fencing projects. The new fences and gates shall be 10' high, per recommendations from the Wildlife Hazard Assessment report dated February 2016. Wildlife Services recommends that any AOA fencing be a minimum height of 10' chain link with 3 strands of barbed/razor wire installed at the top and a buried fence skirt to prevent animals from digging under the fence and to protect the airport from any wildlife in general. This work will greatly enhance the airport security, reduce unwarranted runway incursions and reduce the potential for wildlife incursions. The Project will be a <i>Safety/Security</i> related project per FAA Order 5100.39A.</p> <p>The required funding for the project is being requested from the FFY 2019 AIP program. The Checklist to Support an Environmental Finding of Categorical Exclusion (CATEX) will be submitted as a portion of the project development.</p>
