AFFIDAVIT

RE: Replacement of Programmable Logic Controllers for Filter Nos. 1 – 8 at the Water Treatment Plant by Tri-R Systems Incorporated, DeKalb, IL

I, David E. Schumacher, being duly sworn on oath do hereby state:

1. The Water Production Division seeks to replace and upgrade the programmable logic controllers (PLCs) and related hardware components for filter Nos. 1 – 8 at the City's water treatment plant.
2. The current system is comprised of a single PLC which has become obsolete. Four new PLCs will be installed to provide reliable and continuous operation with current and available components.
3. Tri-R Systems Incorporated has provided a proposal which includes the hardware procurement, installation, and programming of all the various components associated with this project.
4. It is believed to be in the City's best interest for one entity to be responsible for not only the successful integration of all the individual components into an updated, functioning system, but to also have the same entity be responsible for providing the exact required electrical components.
5. Affiant believes Section 2-335 (a) (6) of the Aurora Code of Ordinances is therefore applicable for this agreement.

Further Affiant sayeth not.

David E. Schumacher
Superintendent of Water Production
