

**2021 CONNECTIVITY
PROMOTION
FOR GAS CARS**

Phillips Park GC,

On behalf of **Club Car**, thank you for the opportunity to present product information and pricing options in this proposal to your course for our **2021 SPECIAL GAS CAR PROMOTION**. All features are part of our **Visage Mobile Golf Information Connectivity System**.

As evident, the **VISAGE** Mobile Golf Information System is a “must have” at golf courses that want to provide the ultimate “golfing experience” at their golf course, all while controlling their on-course operation. The **VISAGE** 10.4” high-resolution touch screen is player- and employee-friendly, fast, and vibrant.

Released in 2010, **i3/VISAGE** has been installed on over 150,000 golf cars, with another 1500 to 2000 cars added each month. **Listed below is a partial list of Midwest clubs that have installed the i3/VISAGE technology products:**

THE MAXIMUM ALLOWED VOLUME LEVEL!!!

1 To pair a Bluetooth device, touch the "Connect" button located on the Main Menu or Hole/Approach view.

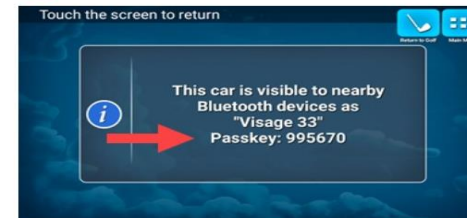

2 Visage is now "discoverable" by your device.

3 Locate and select "Visage xx" on your device.

4 Confirm the code matches and touch "pair" on your device.

ENJOY!

Golfer Experience

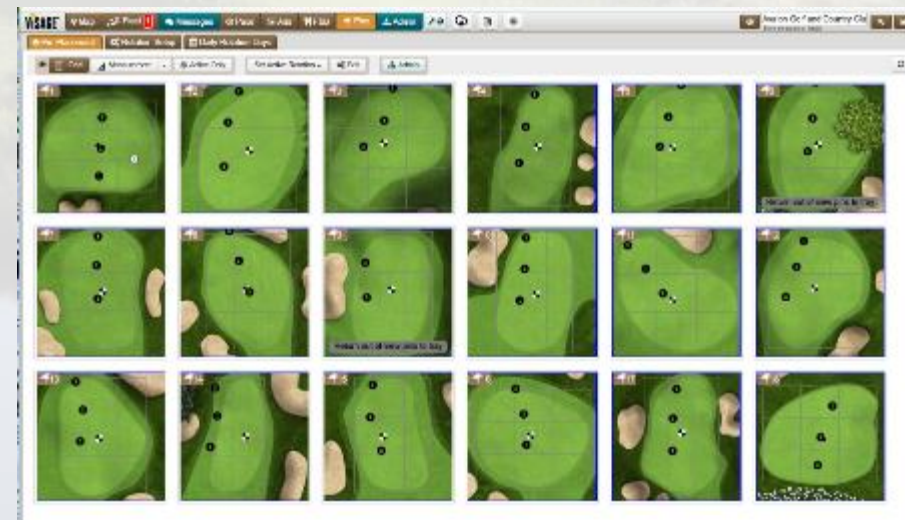

Golfer Experience improves round times by reducing time spent looking for distance and club selection. With Hole Overviews and Dynamic Distances, Golfers instantly know which club to use, and how best to play the hole.

The Blind Tee / Car-Ahead feature allows golfers to see exactly how far a car is ahead of them – insuring a safe and enjoyable round.

The Pin Placement Manager adds to the efficiencies of the grounds crew and pro shop staff. New pin placement locations are easily updated in the VCC and instantly downloaded to the VDU so your golfers are always aware of new challenges, improving round times and revenue.

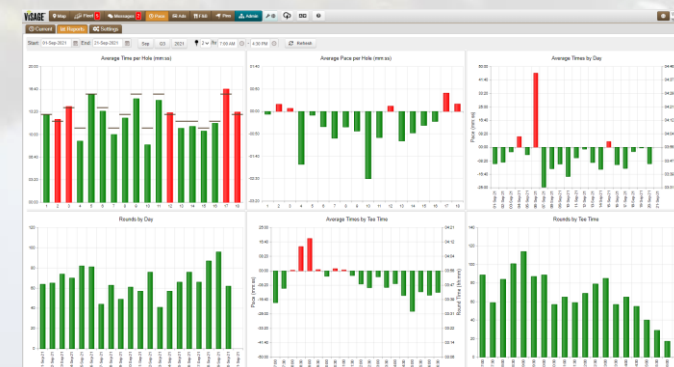

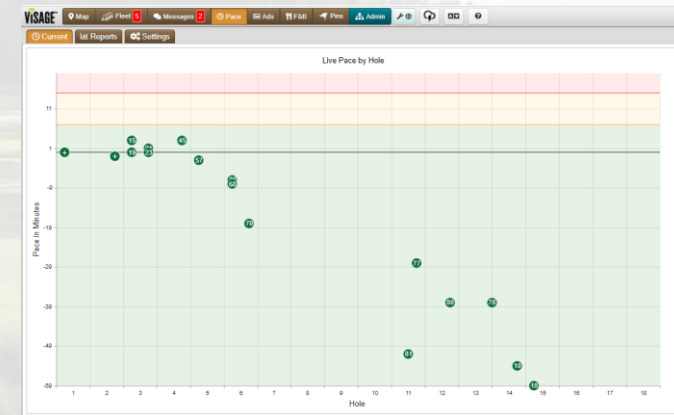

- Hole Overviews
- Dynamic distances to pins and points of interest
- Touch screen for distance
- Tee shot distance
- Blind tee shot / car ahead
- Pin placement manager

Car Tracking

With Visage **Car Tracking module**, managers can monitor pace of play by directly messaging golfers or alerting on-course Marshals to pace challenges or backups. Managers can also send promotional messages or weather warnings to golfers. This can help your bottom line by reducing staffing needs and cutting payroll costs. The interactive touch screen allows golfers to message the Beverage Cart which can increase F&B profit. And rather than assuming the cost of damaged cars, managers can now hold reckless drivers accountable for any accidents that happen.

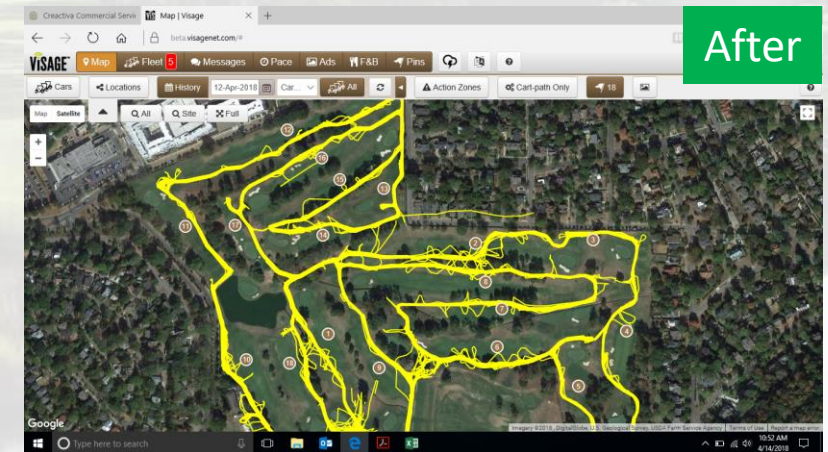

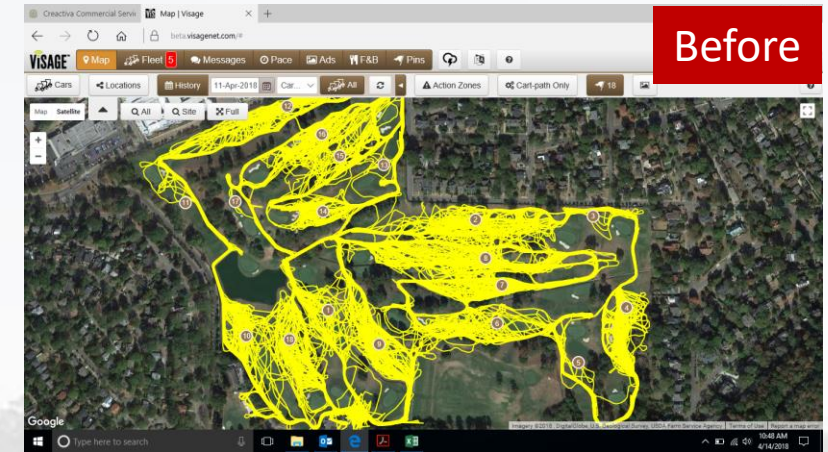

- Real-Time Positioning
- Find car – current or last known location
- Vehicle Drive History
- Pace-of-play tracking & reporting
- Pace notifications
- Rounds Played reporting
- Real-time messaging to and from clubhouse
- Fleet Rotation
- State of Charge monitoring

Car Control

Protect your turf and your players with Geofencing in Visage **Car Control module**. This module fences off off-limit areas of your course, and prohibits cars from traveling in these protected areas. This protects growing grass and players from crossing the road into traffic. With Car Control, liability expenses can be reduced and the safety of your players can be secured.

- Fleet lockdown
 - Scheduled lock/unlock
- Anti-tamper
- Vehicle staging
- Geofencing
 - Action zone messaging
 - Cart path only
 - Action zone violation alerts and history
- Vehicle grouping by vehicle type, marshal, F&B
- Visual notification – action zone violations
- Action zone control - stop/reverse
