QUALIFYING STATEMENT OF PETITION
Nancy L. Hill Elementary School

West Aurora School District 129 serves residents in the west side of the City of Aurora, as well as North Aurora, Sugar Grove, Montgomery, and Batavia. School District 129 has an enrollment of over 12,500 students in ten elementary schools, four middle schools, one high school, one child development center and one special-education facility.

The Board of Education of West Aurora School District 129, as Owner, seeks approval of Rezoning and a Special Use Permit for Educational Services with a Final Plan for a new Hill Elementary School located at 724 Pennsylvania Avenue in the City of Aurora.

In 1888, a one-room schoolhouse was opened at the corner of Pennsylvania and Illinois Avenues. Four years later, a second floor with four classrooms was added. On June 11, 1928, after another addition was completed, the school was renamed to honor Nancy L. Hill, who had taught in the District for seven years and served as a principal for another nineteen years. In 1956, the School District completed another addition. The present capacity of the school is 617 students, not including the three double classroom mobile units currently in use, and the present enrollment of the school is 614 students.

The School District intends to construct a new building on the west side of the site and demolish the existing building after completion. The new school building will have a target capacity of 750 students and an estimated area of 72,341 square feet. The area where the existing building is situated will be converted to playground space. The new building and school site are more fully set forth on the final plans submitted along with this qualifying statement. One of the mobile classroom units will be removed during construction and the other two units will be removed once the new building is completed.

The new school building will enhance the public health, safety, morals, comfort and general welfare of the citizens of the City of Aurora. The building and site will be designed in order to enhance

the use and enjoyment of other property already established or permitted in the general area. After completion of the new building and demolition of the existing school, open space on the site will remain available for public use when not in use by the District. It is anticipated that property values will increase in the immediate area due to the improved school facilities.

The portion of the property where the school is located is currently zoned "R-1" One Family Dwelling District within Aurora, and adjoining parcels owned by the School District are currently zoned "R-3." The School District seeks rezoning to "P" Park and Recreation District. Surrounding uses include low density residential on all sides, except for a single small business located on the northeast corner of Illinois and Pennsylvania Avenues. Building these improvements on the site will have no detrimental effect upon the normal and orderly development or improvement of the surrounding properties within their existing zoning.

Utilities, access, drainage and other necessary facilities are designed to ensure efficient and safe flow of traffic and the elimination of surface and sub-surface water. The School District has acquired additional parcels to the north of the site and intends to use this space to add parking, bringing the total parking capacity to seventy-six (76) vehicles, including two (2) accessible spaces. Those residential parcels to the north of the school will have their curb cuts closed, and ingress and egress points will be redesigned. Ingress and egress after the construction should improve as the new parking and traffic flow is expected to relieve congestion at the beginning and end of the school day. This will be coordinated in conjunction with City staff to address safety concerns and alleviate traffic congestion in the public streets. The School District is always mindful of improving parking and traffic patterns wherever possible.

As with all school buildings, approval will also be received from the Regional Office of Education. However, the school site will be improved in general conformance with the applicable regulations of the zoning district within Aurora. At this time, the School District anticipates that a variance from the City's Codes and Ordinances may be necessary for building height.
