QUALIFYING STATEMENT

The CalAtlantic Group, LLC, a Delaware Limited Liability Company, is proposing the Townes of Abbey Meadows Planned Development, an attached single-family townhome community, that will consist of Two-hundred and twenty-five townhome units. One hundred and thirteen Traditional Style townhomes will be two story in height with front loaded two-car attached garages and the Urban Style townhomes will be two and a half stories in height with rear entry two-car garages. The property is currently zoned R-1(C) One-Family Dwelling District, Conditional Use Planned Development.

1. The Townes of Abbey Meadows development will have a positive effect on the public health, safety, morals and general welfare. Improvement of this vacant parcel will provide new homes for the City of Aurora, complimenting the development of this area that has grown into a newer residential area within the City. Furthermore, its development will complete the transformation of a property that had been set aside for future school purposes but never utilized as such by the Marmion Academy.
2. Use and enjoyment of other established properties will not be adversely affected due to the development of this property in like-manner to adjacent single-family attached townhomes.
3. The proposed subdivision will benefit the property values within the neighborhood. The introduction of these new homes will continue the trend of a thriving residential community area, and placing the property on the tax rolls will generate new income for all relevant taxing bodies.
4. The proposed development is consistent with the normal and orderly development and improvement of the surrounding properties for uses established or permitted within their respective zoning districts. It is an infill development that will continue the buildout of this greater residential neighborhood.
5. The site location is well supported by existing utilities, access to existing street stubs, drainage and other facilities. The proposed development will integrate well into the existing infrastructure, and provide a street extension of Mesa Lane to Raddant Road, which will improve vehicular circulation for existing residents and emergency vehicles.
6. Proposed vehicular ingress and egress for the proposed development will extend the existing Mesa Lane dead-end street to Raddant Road. The streets within the subdivision will allow for access to Kirk Road, which is a major collector roadway. With much of the surrounding land having been developed, this design will not burden existing residential local neighborhood streets, but create better and safer traffic circulation.
7. The conditional use shall, in all other respects, confirm to the R-4A zoning district with the following exceptions:
