To Whom It May Concern:

OpenText is the maker of the EnCase® products which includes software and hardware products which excel at digital investigations and forensic security, helping organizations around the world lower business risk by providing thorough visibility to data everywhere it's stored—on the endpoint, across servers, and into the cloud. The Encase platform has been deployed on millions of endpoints and used by many Fortune 100 companies and government agencies around the world.

Open Text's agent architecture provides a powerful, well-known foundation for corporations, and government agencies to conduct thorough and effective digital investigations in a wide-variety of settings, including intellectual property theft, security incident response, compliance auditing and responding to e-discovery requests—all while maintaining the forensic integrity of the data. Its products sold to corporations and central government entities include EnCase® Forensic, EnCase® Endpoint Investigator, EnCase® Endpoint Security, and EnCase® Information Assurance. OpenText products provide more risk visibility and allows customers to conduct complete and meticulous investigations. EnCase products work within a client's ecosystem with integrations to cloud-based platforms as well as information security alerting and event management systems, threat intelligence providers and orchestration solutions.

EnCase Forensic, EnCase Portable, EnCase Endpoint Investigator, EnCase Information Assurance, Tableau and EnCase Endpoint Security, are unique and proprietary items being solely produced by OpenText.

EnCase® Forensic Training, Endpoint Investigator Training, eDiscovery Training, and Endpoint Security Training Courses, as well as the EnCase® Certified Examiner (EnCE®) certification for computer forensics, the EnCase® Certified eDiscovery Practitioner (EnCEP®) certification, and the Certified Forensic Security Responder (CFST™) certification are all solely produced by OpenText. These courses are only offered at OpenText certified training locations, through our Classroom, VClass (virtual classroom), or via OpenText's OnDemand training platform and are proctored only by OpenText authorized trainers.

Sincerely,

A handwritten signature in blue ink that reads "Dennis Faigal".
