EXPERIENCE

U.S. Congress Intern for Shri Thanedar

- Organized community fundraisers that raised over \$10K in donations, enhancing outreach and support for underrepresented ethnic communities.
- Coordinated multicultural events, successfully engaging diverse groups and promoting inclusivity and understanding among various ethnic backgrounds.
- Facilitated communication and collaboration with community leaders, strengthening ties between the Congressman's office and local ethnic organizations.
- Managed logistics and scheduling for events through Microsoft Excel and Emails, ensuring seamless execution and maximizing community impact and engagement.

BMM YUVA Intern

- Conducted in-depth research under the guidance of Dr. Sayli Natu, a Stanford pharmacist, examining healthcare pathways and identifying elevated cardiovascular risks in post-COVID-19 patients.
- Designed and developed a comprehensive research study focused on assessing and mitigating cardiovascular risks associated with post-COVID-19 recovery.
- Establishing a non-governmental organization (NGO) aimed at providing resources and support to individuals at heightened risk for cardiovascular issues post-COVID-19.
- Received a stipend for intricate work from the organization.

Society of Critical Care of Medicine Volunteer

- Organized national conferences, effectively bringing together industry leaders and healthcare professionals to discuss key issues and advancements in the field.
- Developed and distributed engaging brochures that successfully attracted interest and participation from a wide audience of esteemed healthcare professionals.
- Facilitated outreach to prominent healthcare experts, fostering collaborations and expanding the organization's network of professionals and stakeholders.
- Coordinated logistics and event planning, ensuring smooth execution of conferences and maximizing the impact and reach of the organization's initiatives.
- Offered to work on a regional collaboration with Virtual Reality Study Stanford's Lucile Packard Children Hospital on an investigator-initiated study to incorporate Virtual Reality (VR) in Graduate Medical Education (GME) for learning and management of congenital heart diseases.

Endeavor Health Volunteer

- Accumulated over 300 volunteer hours in a hospital setting, demonstrating commitment and dedication to supporting healthcare operations and patient care.
- Assisted in Lab & Pathophysiology departments, contributing to essential medical processes and gaining hands-on experience in a clinical laboratory setting.
- Supported hospital staff with various tasks, including patient intake, data entry, and patient & visitor interactions, thereby streamlining hospital workflows.

Entrepreneurship Venture

- Developed Careisma, an AI-driven app, revolutionizing a first-ever portable school healthcare system with school-wide health trends.
- Top 5 finalist in the prestigious College of DuPage's Big Idea Pitch Competition, selected from over 100 teams.
- Launching Careisma pilot program at IMSA for the 2024-2025 academic year.
