Business Address [REDACTED], Joliet, IL 60435

Organizational affiliations Institute of Transportation Engineers (ITE - Illinois Section)
Illinois Society of Professional Engineers (ISPE) Ride Illinois

What unique characteristics, qualifications, or experiences would you bring to a board or commission? I'm a professional engineer, #062-064200, with 11 years of experience in transportation engineering. The last two years, I have also been working on transportation and other civil engineering related projects. I'm certified as a professional transportation operations engineer, #3748, since 2014. My project experience includes projects in traffic analysis, safety studies, corridor roadway improvements, and environmental documentation. I've volunteered for professional societies, including the Illinois Section of ITE in which I have served for almost 10 years and am in line to be president in 2020. Please review my current resume and call me for additional information on characteristics, qualifications, and/or project experiences. I would be happy to answer any questions.

Why do you want to be on a board or commission? I get joy out of helping improve communities. I've been living in Aurora for three years now and plan to be here for awhile. Knowing this and having some expertise in this area, I want to help make sure my family and community have the safest and operationally efficient modes of transportation available within the city. I would like to help the ongoing effort to do this in Aurora. Also, if there isn't any room for me on the Board, I would be willing to help out as a volunteer.
